The Fortress Yurt design is the first solid wall, portable Yurt design ever made! The windows are 3 ft. x 4 ft. real glass thermal windows with screens, and the interior walls are a beautiful laminated wood that is secured to the inside lattice wall. This design creates a beautiful interior space, and a gorgeous Yurt from the outside. People have been asking for an affordable Yurt design with this security that is still portable.

20 ft. Yurt roof insulation with canvas inner liner \$890.00

20 ft. Yurt wall insulation \$810.00

24 ft. Yurt roof insulation with canvas inner liner \$1,290.00

24 ft. Yurt wall insulation \$1,120.00

30 ft. Yurt roof insulation with canvas inner liner \$1,650.00

30 ft. Yurt wall insulation \$1,330.00

Insulation Upgrade

We are so glad to offer this upgrade! Finally there is a really effective insulation that works well in yurts. Here are the details:

This insulation consists of reflective aluminum foil on each side of a 5mm closed-cell polyethelene foam center. This creates an R-value of 16! Very effective for heat, condensation, and cold.

Energy Star Qualified, R 16, unaffected by humidity, prevents condensation, prevents 97% of radiant heat transfer, vapor barrier, 19dba noise reduction, does not promote mold or mildew, does not provide for nesting

of rodents, bugs or birds, keeps its shape over time (doesn't collapse). Manufacturer is a member of US Green Building Council.

For the roof insulation, the upgraded insulation has a rustic wood finish on the inside. (Walls do not need this as the interior wall wood covers the insulation.)
